 NOTIONES Project

ABSTRACT

Novel technologies have presented practitioners with new opportunities to improve the intelligence process, but have also created new challenges and threats. Consequently, the timely identification of emerging technologies and analysis of their potential impact, not only on the intelligence community but also on terrorist or criminal organisations, is crucial.

However, time constraints can prevent intelligence practitioners from being updated on the most recent technologies.

In order to address this challenge NOTIONES will establish a network, connecting researchers and industries with the intelligence community. This network will facilitate exchange on new and emerging technologies but also equip solution providers with insights on the corresponding needs and requirements of practitioners. The so gained findings will

be disseminated in periodic reports containing technologic roadmaps and recommendations for future research projects and development activities.

The consortium of NOTIONES includes, among its 30 partners, practitioners from military, civil, financial, judiciary, local, national and international security and intelligence services, coming from 9 EU Members States and 6 Associated Countries. These practitioners, together with the other consortium members, grant a complete coverage of the 4 EU main areas: West Europe (Portugal, Spain, UK, France, Italy, Germany, Austria), North Europe (Finland, Denmark, Sweden, Estonia, Latvia), Mittel Europe (Poland, Slovakia, Ukraine), Middle East (Israel, Turkey, Georgia, Bulgaria, Bosnia Herzegovina, North Macedonia) for a total of 21 countries, including 12 SMEs with diverse and complementary competences.

PROJECT OBJECTIVES

GATHER the needs of intelligence and security practitioners related to contemporary intelligence processes and technologies;

PROMOTE interaction of technology providers and academy with intelligence and security practitioners;

IDENTIFY novel technologies of relevance for practitioners through research monitoring;

PUBLISH a periodic report, summarising key findings in order to orientate future research and development;

ENSURE the commitment and involvement of new organisations in the pan-European NOTIONES network.
